Klass Hero

Klass Hero is a Berlin/Brandenburg based marketplace that connects families with vetted providers of children's activities. We're a small founder team building a product for the growing after-school care market in Germany, and we build it ourselves.

Internship: Software Developer (Elixir) (m/f/d)

Build real software for families. Early-stage team.

City: Potsdam; Starting date (earliest): At the earliest possible; Duration: 3-6 months; Remuneration: 0; Closing date: 01/12/26

Tasks

Using Elixir, build and extend features in Phoenix LiveView (server-rendered, real-time UI)
Work on core marketplace flows: provider onboarding, session management, bulk enrollment, and messaging
Work through GitHub issues, pull requests, and code reviews
See how a two-sided marketplace works from the inside: supply and demand, pricing and commission, trust and safety, and how product decisions affect growth

Requirements

You study computer science or something similar
You can code on your own, without relying on AI tools
You understand your own code and can explain it
Elixir experience is a plus, but willingness to learn is enough
Interest in how businesses and marketplaces work
Initiative: you ask when you're stuck

What we offer

Direct mentoring from our CTO, with a weekly 1:1
Real production code, not throwaway tasks
Code reviews and honest feedback
Flexible hours around your studies
Reference letter
Real impact: your work helps families find safe, vetted activities for their kids
Insight into building a startup, from product to business model

Type: mandatory university internship (Pflichtpraktikum, proof from your university required), unpaid
Location: Berlin or remote
Hours: about 10 per week, flexible around your timetable
Duration: by agreement
