Taktile GmbH - SaaS startup

Taktile is a next-generation decision platform that empowers teams to build, monitor, and optimize automated risk management strategies across the entire customer lifecycle—from credit underwriting and onboarding & KYC/KYB to transaction monitoring and collections. With its low-code UI and best-in-class marketplace of third-party data integrations, Taktile enables credit, fraud, and risk teams to reduce reliance on engineering, adapt quickly to market changes, and ultimately drive growth while lowering operational costs.

Software Engineer Working Student/Intern

Taktile is a high-growth series B start-up, on a fast trajectory to becoming a market leader in the field of automated decision-making. We are looking for Computer Science students with a passion for distributed systems who want to turbocharge their career. If you're ambitious, have strong engineering fundamentals, and want to grow as a software engineer, then this role is for you!

City: Berlin; Starting date (earliest): At the earliest possible; Remuneration: EUR 2,500.00

Working field

Depending on your final team, either work on backend components written in Python / FastAPI, hosted on an AWS serverless architecture, or work on React/Typescript front-end components, or a combination of both!

Engage actively in team rituals such as daily syncs, planning sessions, demos, and technical deep-dive discussions.

Grow as an individual and accelerate your career by learning from our experienced team, contributing to a foundational layer of the product, and joining cross-team learning groups.

Requirements

Taktile is a hybrid company with our Berlin HQ in Germany. Taktile will not cover relocation services for this role.

Fluency in English, both written and spoken, is essential as we operate in a remote environment requiring clear and effective communication.

Strong engineering fundamentals with a passion for simplicity and precision.

Fantastic Computer Science fundamentals. Data structures, algorithms, networking, distributed systems, databases and everything in between!

You are a student looking for an internship/working student position OR you're about to graduate and are looking for an internship.

IDEAL, BUT NOT REQUIRED: Exposure to AWS, especially Lambda; Experience with frontend development - React or similar frameworks.

What we offer

Work with colleagues that lift you up, challenge you, celebrate you and help you grow. We come from many different backgrounds, but what we have in common is the desire to operate at the very top of our fields. If you are similarly capable, caring, and driven, you'll find yourself at home here.

Experience a truly flat hierarchy and communicate directly with founding team members. Having an opinion and voicing your ideas is not only welcome but encouraged, especially when they challenge the status quo.

Learn from experienced mentors and achieve tremendous personal and professional growth. Get to know and leverage our network of leading tech investors and advisors around the globe.

Receive a top-of-market equity and cash compensation package.

Get access to a self-development budget you can use to e.g. attend conferences, buy books or take classes.

Receive a new Apple MacBook Pro, as well as meaningful home office set-up.

Application

You can apply directly through the job ad in our careers page: https://jobs.ashbyhq.com/taktile/bce11078-1da2-4826-a70e-7eccfd702dd1
