Taktile GmbH - B2B Saas Startup

Taktile is a next-generation decision platform that empowers teams to build, monitor, and optimize automated risk management strategies across the entire customer lifecycle—from credit underwriting and onboarding & KYC/KYB to transaction monitoring and collections. With its low-code UI and best-in-class marketplace of third-party data integrations, Taktile enables credit, fraud, and risk teams to reduce reliance on engineering, adapt quickly to market changes, and ultimately drive growth while lowering operational costs.

Back-end Engineer - Team Decide

Taktile is a high-growth, post product-market-fit start-up, on a fast trajectory to becoming market leader in the field of automated decisioning. We are looking for a Mid-Level Backend Engineer to join the Decide Team tasked with owning our core decision execution engine at Taktile, complex back-end systems involved in feature computation, as well as the overall decision flow canvas. If you're ambitious, have strong engineering fundamentals, love doing the simple things exceptionally well, and enjoy propelling a small, dynamic team forward, this role is for you!

City: London, Iasi, Berlin; Starting date (earliest): At the earliest possible;
Duration: Unlimited contract; Remuneration: EUR 55,000.00

Working field

Primarily work on backend components written in Python / FastAPI, hosted on an AWS serverless architecture: Build and enhance our execution engine, our feature computation back-end and other complex subsystems; review pull requests with depth, and optimize CI/CD pipelines.

Engage actively in team rituals such as daily syncs, planning sessions, demos, and technical deep-dive discussions.

Grow as an individual and accelerate your career by learning from our experienced team, contributing to a foundational layer of the product, and joining cross-team learning groups.

Requirements

Taktile is a hybrid company with options to work from either our Berlin HQ in Germany or the Iasi Hub in Romania. Taktile will not cover relocation services for this role.

Fluency in English, both written and spoken, is essential as we operate in a remote environment requiring clear and effective communication.

Strong engineering fundamentals with a passion for simplicity and precision

Prior industry experience with Python.

Experience with databases and AWS or similar cloud providers.

Proficient in RESTful API development and management.

IDEAL, BUT NOT REQUIRED: DynamoDB/Postgres/Pydantic/AWS Lambda/SQLAlchemy; Experience with frontend development (e.g., React or similar frameworks).

What we offer

Work with colleagues that lift you up, challenge you, celebrate you and help you grow. We come from many different backgrounds, but what we have in common is the desire to operate at the very top of our fields. If you are similarly capable, caring, and driven, you'll find yourself at home here.

Experience a truly flat hierarchy and communicate directly with founding team members. Having an opinion and voicing your ideas is not only welcome but encouraged, especially when they challenge the status quo.

Learn from experienced mentors and achieve tremendous personal and professional growth. Get to know and leverage our network of leading tech investors and advisors around the globe.

Receive a top-of-market equity and cash compensation package.

Get access to a self-development budget you can use to e.g. attend conferences, buy books or take classes.

Receive a new Apple MacBook Pro, as well as meaningful home office set-up.

Application

You can apply directly through the job ad in our careers page: https://jobs.ashbyhq.com/taktile/883a7bf0-a57f-4871-8265-c12ba90330a4
