

Motorola Solutions Germany GmbH - Junior Systems Engineer for Germany / Berlin

At Motorola Solutions, we believe that everything starts with our people. We're a global close-knit community, united by the relentless pursuit to help keep people safer everywhere. Our critical communications, video security and command center technologies support public safety agencies and enterprises alike, enabling the coordination that's critical for safer communities, safer schools, safer hospitals and safer businesses. Connect with a career that matters, and help us build a safer future.

Junior Systems Engineer for Germany / Berlin

City: Berlin; Starting date (earliest): At the earliest possible; Duration: unlimited;
Remuneration: based education and experience; Reference number: R55161; Closing date: 31/12/25

Working field

We're looking for curious and passionate electrical engineering graduates to join us and help us deploy communication solutions and video security systems. You will participate in the designing and integrating of our systems in the customer's IT and communication environment as well as learn and support mission critical communication and video technologies. We offer full training and support, so new graduates are encouraged to apply.

What you will do as Junior Systems Engineer:

- .) Understand customers' operations and the environment in which our systems will be integrated.
- .) Learn about traditional mission critical voice and data communication, command centres and video security technologies.
- .) Provide support and execute the given tasks e.g. define, write, update technical documentation for customer projects or validate and test our systems within the client environment.

Requirements

- .) Bachelor's or Master's degree in Telecommunications, Electrical Engineering or IT.
- .) Fluent in German and English.
- .) Eligible to live and work in Germany as this position requires security clearance approval from the German government authorities.
- .) A team player person who enjoys to work with other international based engineers and is highly motivated to start her/his career.
- .) Good communication skills and confidence to present solutions to colleagues/customers/users is essential.
- .) It is an advantage, if you are interested in/have experience in IT and communication engineering, IP networking and cyber security.

The role requires the flexibility to travel within the Central Europe region for short periods, so a valid driving license would be helpful.

We are open to consider applicants from across Germany to be located in our Berlin office.

What we offer

.) You will be involved in the newest technologies used for mission critical communication and video security solutions. Be part of the most-valued and prestigious projects.

.) Opportunity to join an Innovative company with 90+ years experience in Public Safety Communication Solutions.

.) Leverage a great variety of development possibilities, frame your continuous development plan and shape your role and profile.

.) You are part of a dynamic and experienced team with great attitude and team spirit with best-in-class compensation and benefits.

Application
