

Renewables Academy (RENAC) AG - Personal

The Renewables Academy (RENAC) AG, based in Berlin, Germany, is one of the leading international providers for training and capacity building on renewable energy and energy efficiency. We have one of the largest E-Learning portfolios worldwide with 150+ courses and trained around 36,000 participants so far. Our headquarter is located in Berlin Mitte, and we currently have 65+ employees.

Student Assistant for Online Course Development (m/w/d)

City: Berlin; Starting date (earliest): At the earliest possible; Remuneration: 15 €-17 €/h

Working field

We are looking for a motivated and creative Student Assistant to join our team in developing online courses. If you are passionate about online education, media design or media pedagogy and eager to contribute to the creation of innovative educational content, this role is for you. You will support the development of online training materials, collaborate with our educational experts, and help to ensure that our courses meet high standards of quality and accessibility.

1. Assist our online department in developing e-learning course materials and graphics using authoring tools such as KnowledgeWorker.
2. Help manage our e-learning platform (Moodle), including user management, creating training programs, and maintaining the question bank.
3. Provide general support to the online department with daily operations.

Requirements

What makes you a great fit:

- Currently enrolled at a university in Berlin with studies continuing at least until spring 2027.
- Pursuing a degree in Education, Media Design, Media Pedagogy, or a related field, and passionate about transforming educational experiences.
- Fluent in English (C1).
- Good Portuguese and/or French language skills are a plus.
- Experience in crafting engaging didactic materials for online courses and experience with Moodle or similar LMS platforms is a plus.

What we offer

- A very friendly, flexible and international work environment;
- Flexible working time depending on university schedules;
- Interesting work tasks with the possibility to learn and develop;
- Be part of an international team passionate about renewable energy, energy efficiency and sustainable development.

Application

We are looking forward to receiving your application including your cover letter.
