

ablefy GmbH

About us At ablefy, we believe that passion can turn into a career for anyone! With our cloud-based SaaS platform solution, ablefy.io, we offer an easy and efficient way for everyone to create and sell digital products and online courses. More than 70,000 entrepreneurs have already placed their trust in our expertise! Our story began in 2015, and for the first five years, we grew organically, becoming a profitable company with a team of around 60 employees. Then, in September 2021, we raised \$38 million in series A funding led by Target Global, with participation from Partech Ventures and Avid Ventures. Since then, we've doubled in size! Since then, our company size, products, features, and services have doubled and we have become Germany's No. 1 platform for coaches, consultants, speakers, and service providers. We continue to grow to this day – that's why we're looking for you. Our mission; to build software that empowers everyone to start, run and grow a successful digital business - borderless, is supported by our high performance principles that are crucial to our success: - Radical Collaboration - Constructive confrontation - Adaptive execution - Collective ambition - Evolving expertise - Empathetic leadership Diversity & Inclusion At ablefy, we embrace our differences, as they are our greatest strength. We recognize that everyone has a unique perspective based on their experiences, identities, and thought processes, and we strive to create an inclusive environment for all. Discrimination based on race, religion, color, national origin, gender identity or expression, sexual orientation, age, marital status, disability status, or any other aspect that makes you unique is not tolerated at ablefy. We aim to make growth accessible to everyone! We know that no candidate checks every single box, and that's okay! If you're excited about this role and think you can bring something valuable to our team, we encourage you to apply—even if you don't meet every requirement. We'd love to hear from you! AI at ablefy As an AI-first company, we put intelligent technology at the heart of everything we do. AI is part of how we build, learn, and grow together. It helps us work smarter, move faster, and focus on creating real impact. We believe the strongest results come from combining thoughtful technology with curious, driven people — and we're excited to shape what's next, together.

Working Student Software Engineer (Ruby & React) (F/M/X)

City: Berlin; Starting date (earliest): At the earliest possible; Remuneration: by agreement

Tasks

Description

ablefy is transforming the way people sell knowledge and digital products. While the world of online business is massive and growing fast, many creators are still stuck using clunky, outdated tools. We're here to change that with a modern, all-in-one platform that makes selling digital content seamless. If you want to build technology that empowers entrepreneurs, we'd love to have you on the team!

At ablefy, we replace manual processes and fragmented tools with smart, automated digital solutions. Our platform allows creators to manage their entire business—from payments to course delivery—in real-time, helping them make better, data-driven decisions.

Responsibilities

- **Build and Ship Features:** Join our cross-functional team to develop new features with Next.js (React) on the front end and build scalable backend solutions with Ruby on Rails.
- **Database & API:** Contribute to the design, implementation, and maintenance of our REST API and database models.
- **Front-end Contribution:** Implement UI components, use state machines and CSS preprocessors, contribute to our component library, and ensure responsive design.
- **Performance and Quality:** Write clean, high-performance code that prioritises quality across the full stack.
- **Collaborate:** Work closely with other developers and experts to solve technical challenges.

Requirements

- **Background:** You're studying Software Engineering or a related field and have hands-on coding experience in web development (through internships, side projects, or previous jobs).
- **Tech Stack:** Proven experience with Ruby on Rails and familiarity with modern frontend technologies like Next.js and React.
- **Styling Skills:** Familiarity with CSS and building responsive interfaces.
- **Quality Focused:** You believe in writing "clean code" and have some experience with testing tools.
- **Mindset:** You're a problem-solver who gets things done and isn't afraid to think outside the box.
- **Communication:** You're a proactive team player who loves learning, sharing feedback, and growing with others.

What we offer

- Responsibility and trust from day 1.
- Individual coaching and further training to support you in your development.
- A Culture of equity and Inclusion where you are appreciated for the person you are.
