

OSYPKA GmbH

Intern - Process Engineering (m/f/d)

Manufacturing Engineering | Rheinfelden, Germany | Full-time | 6 Months | Start: August 2026 OSYPKA GmbH is a leading MedTech company specializing in cardiology, active implants, catheters, and CDMO services. Our life-critical medical devices are used in hospitals worldwide. We are looking for a motivated Master's student to join our Manufacturing Engineering team and contribute to the continuous improvement of our manufacturing processes.

City: Rheinfelden; Starting date (earliest): At the earliest possible; Duration: 6 months; Remuneration: Competitive internship compensation

Tasks

Your Mission

Drive process improvements for Balloon Catheters (VACS) and Implantable Pulse Generators (IPG) while gaining hands-on experience in a highly regulated MedTech environment. Your work will directly impact product quality, process stability, and manufacturing performance.

Your Responsibilities

- Analyze manufacturing processes and identify optimization opportunities
- Investigate quality issues using structured problem-solving methods
- Support the implementation and validation of process improvements
- Assist with process documentation in accordance with ISO 13485
- Participate in process validation activities (IQ/OQ/PQ)
- Present findings and recommendations to the engineering team

Requirements

- Master's student in Mechanical, Manufacturing, Biomedical Engineering, or a related field
- Strong analytical and problem-solving skills
- Knowledge of Lean Manufacturing methods is an advantage
- Hands-on mindset and interest in manufacturing environments
- Good English skills and basic German proficiency

What we offer

- Competitive internship compensation

- Mentoring by experienced Manufacturing Engineers
- Opportunity to combine the internship with a Master's thesis
- Exposure to medical device manufacturing and regulatory standards
- International and collaborative working environment

Start: August 2026 | Duration: 6 Months
