

Caplend Technologies GmbH - Blockchain / AI Agents / Stablecoin Payments

About Us Our vision is to build a compliant stablecoin infrastructure that empowers businesses to offer seamless banking features to their users, wherever they need them. Through our single API, businesses can easily receive, convert, and move money faster and at lower cost. We're building APIs that enable AI agents, set up with programmable, compliant wallets, to hold money, make transactions, and pay clients or other agents.

Blockchain / AI Agents / Stablecoin Payments Software Product Management

City: Berlin; Starting date (earliest): At the earliest possible; Duration: 1 year;
Remuneration: 20-25 EURO; Closing date: 31/07/25

Working field

We're looking for a motivated and detail-oriented working student to join our product team at Caplend. In this role, you'll support the end-to-end process of turning product ideas into real features - from research and planning through to execution and evaluation - all within an agile and fast-moving fintech environment. A particular focus will be on helping us design and build AI-driven products that enhance user experience and automate key financial processes.

This is a great opportunity for students who want to gain hands-on experience in digital product management, blockchain user research, and fintech innovation, especially in the rapidly evolving field of applied artificial intelligence and AI Agents.

Requirements

- Currently enrolled in a Bachelor's or Master's degree program with a focus on IT, business informatics, computer science, or a related field
- Strong analytical mindset and high attention to detail
- Excellent communication skills in English; German is a plus
- Hands-on, tech-savvy approach, you enjoy exploring digital tools and understanding how things work
- Self-driven and proactive, with the ability to work independently and manage small projects
- Eager to learn and grow in a dynamic, regulated fintech environment; familiarity

with financial technologies or EU regulations (e.g., MiCAR) is a plus

What we offer

What we offer

- A chance to make a real impact at a fast-growing fintech shaping the future of finance
- A flexible working environment (100% remote)
- Flat hierarchies, quick decision-making, and room for your ideas
- A supportive team culture
- Opportunities to gain deep insights into product, compliance, and strategy in the evolving EU crypto and financial services landscape
- Competitive compensation and personal development opportunities
