

## **Technische Universität Dresden - DRESDEN-concept Genome Center**

The DRESDEN-concept Genome Center (DcGC) is a scientific service facility that provides state-of-the-art infrastructure and expertise in the field of genome research. Its service portfolio covers a broad range of classical and advanced applications in next-generation sequencing (NGS), including bioinformatics analyses and spatially resolved genome analysis in tissue sections. As one of four DFG-funded NGS Competence Centers in Germany, the DcGC plays a key role in the national genomics research landscape. Initiated by TUD Dresden University of Technology and the Max Planck Institute of Molecular Cell Biology and Genetics (MPI-CBG), the center is now jointly supported by additional partner institutions within the DRESDEN-concept research alliance. The strategic direction and management of the DcGC are jointly overseen by the DcGC Steering Board – comprising representatives of the supporting institutions – and the center's leadership. Together, they ensure the facility's effectiveness, innovative capacity, and scientific excellence. For this key leadership position, we are seeking a dedicated individual with scientific depth, strategic vision, and strong leadership skills. For TUD diversity is an essential feature and a quality criterion of an excellent university. Accordingly, we welcome all applicants who would like to commit themselves, their achievements and productivity to the success of the whole institution.

### **Head of DcGC (m/f/x)**

The DRESDEN-concept Genome Center offers a position as Head of DcGC (m/f/x) (subject to personal qualification employees are remunerated according to salary group E 15 TV-L) starting as soon as possible. The position is limited on a trial basis for a period of 24 months in accordance with § 31 of the TV-L (Collective Agreement for the Public Service of the Länder). As the Head of the DcGC, you will assume a central leadership role in the strategic, scientific, and operational management of the center. In this capacity, you will be supported by a well-established and experienced team that will actively assist you in fulfilling your responsibilities and in further developing the DcGC.

Stadt: Dresden; Beginn frühestens: Frühestmöglich; Dauer: limited on a trial basis for a period of 24 months in accordance with § 31 of the TV-L (Collective Agreement for the Public Service of the Länder); Vergütung: subject to personal qualification employees are remunerated according to salary group E 15 TV-L; Bewerbungsfrist: 11.08.2025

### **Aufgabenbeschreibung**

- scientific lead and overall responsibility for the operation of the DcGC in the areas of experimental research and scientific services – including scientific, organizational, financial, and personnel management
- scientific conception and implementation of interdisciplinary, complex and innovative research and development projects, particularly in the scientific methodological advancement in the fields of single-cell and spatial genomics, epigenomics, multi-omics integration, and translational genomics.
- particularly complex scientific research activities, along with academic advancement and the expansion of the research portfolio in the field of genome research and related areas – in particular through the establishment of AI-supported analysis platforms and

cloud-based data infrastructures for the efficient processing of large-scale data sets.

- Strategic development of the DcGC, taking into account the interests of the supporting institutions as well as economic framework conditions, ensuring optimal use of resources, cost control, and personnel management, including all related tasks
- co-shaping organizational and strategic development processes in collaboration with other internal and external stakeholders - through continuous analysis and optimization of internal structures, workflows, and interfaces with the supporting institutions - with a particular focus on efficiency and cost-effectiveness
- planning, management, and coordination of the overall budget, including regular reporting to the supporting institutions and funding bodies
- professional advising the DcGC Steering Board on strategic matters, including the preparation of well-founded decision-making documents for the board and its offices, and implementation of resolutions by internal and external stakeholders
- independent acquisition and coordination of third-party funding, as well as active support of researchers in applying for funding and in projects involving the DcGC
- scientific conception, organization, and implementation of events and workshops tailored to specific target groups
- promotion of interdisciplinary collaboration through targeted networking with national and international research institutions, specialized centers, and partner organizations - particularly in the field of genome research
- personnel leadership of an interdisciplinary team, including the promotion of a constructive and motivating work culture, responsibility for strategic personnel development, and professional training of approximately 20 staff members

## **Erwartete Qualifikationen**

- university degree and a doctorate (PhD) in biology, biochemistry, medicine, or a closely related field
- the advertised position requires a strong academic qualification, with proven research expertise in molecular genome research, particularly in modern high-throughput sequencing technologies (e.g., Next-Generation Sequencing), single-cell and spatial genomics, epigenomics, and multi-omics integration
- professional experience in the specialized fields of molecular biology, genetics, genomics, or computational biology, ideally combined with in-depth knowledge of high-throughput sequencing, single-cell and spatial genomics, and multi-omics. Familiarity with bioinformatics analysis platforms, as well as AI-supported data processing and management, is desirable.
- experience in applying for and managing in challenging and complex research projects, as well as in science management
- ideally, experience in setting up and managing scientific service facilities (core facilities)
- proven leadership experience, preferably in interdisciplinary and international environments
- strong ability to work independently in a structured and conceptual manner
- excellent team skills, strong organizational competence, and a pronounced service orientation
- excellent communication skills, particularly with regard to effective collaboration in a diverse, collaborative, and interdisciplinary research environment
- very good written and spoken proficiency in both German and English

## Bewerbung

We offer:

- a responsible and diverse leadership position within an excellent scientific environment
- the opportunity to play a key role in shaping the strategic development of the DcGC
- the chance to actively contribute to the development of Dresden as a research hub and to support outstanding research initiatives
- a dynamic, international, and interdisciplinary working environment with dedicated colleagues and collaboration with renowned experts from science and medicine
- a salary in accordance with the collective agreement for the public service of the federal states (TV-L), along with attractive conditions and social benefits of the public sector
- supportive conditions for achieving a good work-life balance
- the prospect of a permanent employment contract following successful completion of the trial period in the leadership role.

TUD strives to employ more women in academia and research. We therefore expressly encourage women to apply. The University is a certified family-friendly university. We welcome applications from candidates with disabilities. If multiple candidates prove to be equally qualified, those with disabilities or with equivalent status pursuant to the German Social Code IX (SGB IX) will receive priority for employment.

Please submit your detailed application with the usual documents by August 11, 2025 (stamped arrival date or the time stamp on the email server of TUD applies), preferably via the TUD SecureMail Portal <https://securemail.tu-dresden.de> by sending it as a single pdf file to [lisa.lehmann1@tu-dresden.de](mailto:lisa.lehmann1@tu-dresden.de) or to: TU Dresden, CMCB Technologieplattform, Dr. Dana Schoder, Tatzberg 47/49, 01307 Dresden, Germany. Please submit copies only, as your application will not be returned to you. Expenses incurred in attending interviews cannot be reimbursed.
