

adsquare GmbH

Adsquare is the global audience & location intelligence company making marketing a whole lot smarter. With eight offices around the world we are a truly international company but one united team working towards our vision: empowering companies to accelerate business growth by staying at the forefront of data-driven marketing. We are pioneers in advertising and data. We were born mobile, before it was a necessity, and have pioneered data-driven advertising in display and now DOOH. We have the smartest people, working with the best tech, so we can drive the pace of change. We are visionaries. We see a better way for marketers and are doing everything we can to make that a reality. We believe in innovation and the power of technology. We believe in constantly improving what we're doing because the work is never done. We believe in what we do and rise to meet our own high standards. If there's a problem, we fix it, humbly and without fuss or delay. Although our technology is best-of-breed, we are unassuming and modest in our approach. We are passionately candid, both with each other and with our clients. We take the time to explain our approach to their problem, confident there is nothing to hide. We are consistent and true to our word. We don't take shortcuts but focus on being our clients' most reliable partner. We make promises - and we keep them. As a result, clients enjoy spending time with us, because we are good people.

Business Intelligence - Intern (m/f/d)

City: Berlin; Starting date (earliest): At the earliest possible; Remuneration: tbc

Working field

Business Intelligence

Requirements**YOUR PROFILE:**

- Genuinely passionate about data and using it to solve puzzles.
- Familiar with the basics of SQL (think SELECT, JOIN, WHERE).
- A problem-solver who enjoys digging into data to find patterns and answers.
- Someone with an eye for design who believes that how data looks is just as important as what it says.
- A great communicator (in English) who is comfortable asking questions and sharing what you learn.
- A self-starter who is eager to learn and take ownership of your projects.

WHAT YOU WILL DO:

- **Enhance & Develop Dashboards:** You'll help update and refine our existing Tableau dashboards, applying UI/UX best practices to make our data more intuitive. You'll work alongside our Senior BI Analyst to troubleshoot calculations and validate data.
- **Dive into our Modern Data Stack:** Get hands-on experience with our data warehouse (Snowflake) by supporting the team in migrating dashboards. This is your chance to get direct exposure to dbt, SQL, and data modeling concepts.
- **Support the BI Environment:** Learn the fundamentals of maintaining a BI platform by assisting with organising our Tableau environment and helping improve our internal knowledge base in Confluence.
- **Learn the BI Process:** Participate in our team's agile workflow and shadow stakeholder meetings to understand how business needs are translated into technical requirements and analytical solutions from start to finish.

What we offer

- Be part of an ambitious company whose drive is to take the advertising world into a new era.
- Receive direct, hands-on mentorship from experienced BI professionals who are invested in your growth.
- Become part of an amazing team that believes in empowering people with data.
- Unfold your abilities and see your work make a real impact, supporting key decisions across our Sales, Finance, and Product teams.
