

NoDi GmbH

Beautiful, smart products for kids that deliver the perks of smartphones - minus the risks.

Product Testing & Quality Assurance (m/f/d)

About the role: We're looking for a motivated working student to support us in testing our hardware product and its companion mobile app. You'll help ensure our product matches the product requirements and meets our standards of functionality, reliability, and user experience.

City: Berlin; Starting date (earliest): At the earliest possible; Duration: 3 Months;

Remuneration: 16€/h; Reference number: 001; Closing date: 09/11/25

Working field

- Run functional and performance tests on our hardware device and mobile app
- Document test results and report bugs or irregularities to the QA/development team
- Prepare and maintain test cases and test plans when necessary
- Assist in setting up test environments (devices, firmware, app versions)
- Provide feedback on product usability and user experience

Requirements

- Enrolled student in Computer Science, Electrical Engineering, Information Systems, or a related field
- Interest in product testing, hardware-software interaction, and quality assurance
- Basic understanding of software, mobile apps, or embedded systems
- Structured, detail-oriented, and consistent working style
- Good communication skills in English

What we offer

- Hands-on experience in a real hardware-software product environment
- Flexible working hours compatible with your studies
- A collaborative team and open feedback culture
- Opportunity to learn QA processes and tools

Application

Just sent us an email to development@nodi.kids .
