

## **IHP GmbH - Leibniz-Institut für innovative Mikroelektronik**

Das IHP ist ein Institut der Leibniz-Gemeinschaft und betreibt Forschung und Entwicklung zu siliziumbasierten Systemen, Höchstfrequenz-Schaltungen und -Technologien einschließlich neuer Materialien. Es erarbeitet innovative Lösungen für Anwendungsbereiche wie die drahtlose und Breitbandkommunikation, Sicherheit, Medizintechnik, Industrie 4.0, Mobilität und Raumfahrt. Das IHP beschäftigt ca. 330 Mitarbeiterinnen und Mitarbeiter. Es verfügt über eine Pilotlinie für technologische Entwicklungen und die Präparation von Hochgeschwindigkeits-Schaltkreisen mit 0,13/0,25 µm-BiCMOS-Technologien, die sich in einem 1000 m<sup>2</sup> großen Reinraum der Klasse 1 befindet.

### **Research Assistant / PhD position (m/f/d) for CMOS- and RRAM-based IMC Architectures: Mixed-Signal Design**

Job-ID: 3035/26 | Department: System Architecture | Working Time: 40h/week | Salary: E13 TV-L | Limitation: 2 years with option of extension | Entry Date: as soon as possible

City: Frankfurt (Oder); Starting date (earliest): At the earliest possible; Remuneration: TV-L

#### **Tasks**

We are looking for a motivated researcher to join the System Architectures Department to mainly work designing and testing CMOS- and RRAM-based IMC architectures manufactured using IHP 130nm CMOS technology, and mainly used for performing Vector Matrix Multiplications (VMMs). Different mixed-signal circuit designs are going to be explored in order to assure the trade-off between performance, power-consumption and reliability. In more detail, these different types of IMC architectures are going to be integrated in an AI platform including not only other AI accelerators, but also a RISC-V that orchestrates AI applications' execution. It is anticipated, the candidate will work towards a PhD. Your detailed tasks will include:

- Mixed-signal design and test of CMOS- and RRAM-based IMC architectures
- Layout generation of the designed architectures
- Support in manufacturing and characterization

#### **Requirements**

You hold a Master's degree in computer science, electrical engineering, or a related field. You have good knowledge and experience in mixed-signal design and test and layout generation. Significant experience with mixed-signal design EDA tools is requested. Additionally, knowledge and passion for conventional and non-conventional AI architectures and heterogeneous integration assuming CMOS and novel devices is favorable.

You will also be a strong team player. We are looking for a team member who can structure their own work and bring a well-organized and systematic approach to working with creative minds. You will be an ideal fit for this position if you have experimental,

analytical, and problem-solving skills, very strong communication skills, and the ability to quickly learn how to use the latest technical equipment, including various software. You must be fluent in English. German language skills are welcome. Further development of German language skills is expected and strongly encouraged, e.g. through in-house language courses and intensive courses.

## **What we offer**

Conduct research in a challenging, multinational environment giving you excellent career opportunities. You will have the chance to establish international reputation at the edge of top-notch technologies.

It is important to us to support the individual career developments (e.g. conferences, advanced trainings) as well as the personal needs of our employees by offering flexible working hours and the possibility to work off-site. The compatibility of work and family is highly valued. More information about our scientific excellence and the working environment at IHP can be found on our website.

IHP is TOTAL E-QUALITY-certified for equal opportunities for women and men at work and actively pursues the equality of all gender and all groups of people. We promote the professional development of women and strongly encourage them to apply. Disabled applicants, qualified according to the above criteria, will be given preference over other candidates with equivalent relevant qualifications.

Further advantages:

30 days holiday | special annual payment | Company pension scheme (VBL) | Flexible working hours, also part-time (no core working hours) | Possibility to work up to 40 % independent of location according to company agreement | A wide range of further training opportunities in-house or within the framework of business trips | Discounted company ticket with monthly allowance of € 15,75 for various fare zones | Good transport connections, free parking at the institute | Structured induction and actively supported integration into the institute (welcome workshop, intercultural workshop, joint leisure activities)
