

## **Max-Planck-Institute for Human Development - Emmy Noether Gruppe RAVEN**

The Max Planck Institute for Human Development in Berlin is an internationally oriented research institute. We want to understand how and why humans develop differently, which factors play a role in this, and how these factors influence each other. Driven by the conviction that we can shape our living conditions in such a way that all people can realize their personal potential throughout their lives, we study our behavior, our development, and our competencies in relation to our physical, social, and technological environment.

### **Psychology Internship Position (39 hours/week)**

The RAVEN group studies how changes in early foundational memory abilities and translate to children's real-world memory capacities from age 4 to age 10. This internship will focus on a new behavioral paradigm that assesses how children and adults learn new information and preserve memories of specific instances.

City: Berlin; Starting date (earliest): 01/12/26; Duration: 3 months; Remuneration: 450 Euro; Closing date: 28/08/26

### **Tasks**

- Supporting (AI-based) image generation for experimental stimuli
- Recruitment and scheduling of participants
- Data collection, including virtual testing sessions with children (ages 4–10) and adults (ages 18–35)
- Participation in weekly scientific team meetings
- Opportunity to gain insights into other RAVEN research projects, depending on interest and availability

### **Requirements**

- Strong interest in developmental psychology and behavioral research
  - Native German speaker with very good English proficiency (data collection will be conducted in both German and English)
  - Reliable working style and strong communication skills
  - Ability to interact with participants (including children) in a professional and friendly manner
- Additional assets (not required):
- First experience with research, data collection, or experimental studies
  - Interest in digital tools, AI-based image generation, or stimulus creation
  - Organizational skills

### **What we offer**

- Work in a young and international team

- Flexible working hours; Option of some remote working
- Insight into all stages of preparation, implementation and evaluation of developmental psychology studies
- Training in the implementation and evaluation of complex behavioral data analyses

## **Application**

Please send your application with a cover letter, CV (without photo), bachelor's or intermediate examination certificates, high school diploma and job references (if available) in one PDF file by email to [raven@mpib-berlin.mpg.de](mailto:raven@mpib-berlin.mpg.de) by August 28 2026.
